## **MetroNet Begins Construction in Romeoville**

Fiber-optic communications service provider, MetroNet, has officially begun construction of a multimillion-dollar 100% fiber network in Romeoville.

With construction of MetroNet's state-of-the-art fiber infrastructure commencing, Romeoville is officially on its way to becoming one of the fortunate communities nationwide to enjoy the economic and lifestyle benefits of a "Gigabit City."

Crew members working with MetroNet have begun posting informational yard signs on individual properties in areas of early construction to communicate activity with area residents.

Residential consumers in Romeoville will soon have access to Internet speeds of up to 1 Gigabit per second, interactive fiber TV service with incredible picture quality and reliable feature-rich fiber phone service, all at affordable rates.

MetroNet also plans to offer a full suite of business communications services ranging from a scalable hosted PBX phone solution for small and medium businesses all the way up to customized network services tailored to the specific needs of larger customers.

Company Vice President and General Manager Kevin Stelmach explained that MetroNet will run 100% fiber optic lines direct from source to consumers in Romeoville. A complete fiber optic network using glass fibers—instead of conventional copper cable lines—offers a bandwidth much greater than other available technologies. More bandwidth brings greater speed and consistency. Stelmach said the expanded connectivity can dramatically impact a city’s economic advancement in areas of business growth, education, medical services and residential quality of life.

"Fiber optic connectivity is one element of Romeoville's future-facing plan for prosperity, which includes providing residents and businesses access to multiple resources with greater capacity," said Mayor John Noak.

Residents can register online to receive an update when MetroNet begins installation in their neighborhood at [metronetinc.com/romeoville](http://metronetinc.com/romeoville) or by calling MetroNet locally at 844-675-9558. They can also check their address for serviceability at any time or sign up for services early by going to [www.metronetinc.com](http://www.metronetinc.com) and clicking “order now.” Early sign-up ensures residents that their home will be among the first for installation when MetroNet service reaches their neighborhood.

#### **About MetroNet**

MetroNet, a cutting-edge communications service provider, delivers the latest in fiber television technology, high-speed Internet, and local and long distance phone service over its 100% fiber optic network. Headquartered in Evansville, Ind. and serving 25 communities, MetroNet provides fiber-to-the-premise (FTTP) technology to homes and businesses within its footprint giving its customers state-of-the-art quality, speed and reliability.
